SOL RACE RECORD

Sailonline’s polar for the Falkun was inducted into the SOL Boathouse in 2012, after having been created for racing that year’s "Sail Around Turkey". However, at the last minute, the 90ft Monohull was chosen instead, and the Falkun’s maiden voyage on a SOL racecourse had to wait till 2016 (see the Racelist below).

The Falkun’s IRL sister ship is of course the legendary "Maltese Falcon". One of the highest-tec sailing vessels on the planet, capable of being sailed off her moorings by a single operator, a more apposite choice for SOL’s computer-simulated yacht racing is hard to imagine.

Sofa-sailing par excellence!!
