SOL RACE RECORD

When the Young 88, designed by the legendary Jim Young, was first introduced to SOL in the Autumn of 2009 for SOL's first running of the Auckland to Russell race up the eastern coast of New Zealand's North Island, it was already a very popular one-design keelboat class "down under".

Since then, the class has gone from strength to strength, in real life and on SOL, where it has built up an impressive racing record, which you can see [here](#).
