**SOL RACE RECORD**

Of all their something .7's, the First 40.7 has been the hardest to beat – on the race course, and in your pocket. Designed by Bruce Farr (again) and launched in 1999, over 700 shallower draft cruisers and deep draft racers had been built by the time the design went out of production in 2008, the very year we introduced her cruiser version to the SOL boathouse.

Two years later we got our hands on an accurate polar for the deep draft racer, so named her v2 and the original cruiser v1. We have consistently raced both versions regularly and it could be that the racelist hyperlinked below includes the odd v2. We stand to be corrected!
