SOL RACE RECORD

After competing at the front end of the Mini6.50 fleet for half a decade in their Sam Manuard designed prototypes, Slovenian friends Andraž Mihelik and Kristian Hajnšek, decided there had to be an opportunity to translate the essential concepts of the Mini into a small, fast, simple production boat.

By 2009, their new company, Seascape in Ljubljana – 100 km inland from Trieste at the top of the Adriatic! – had translated this ambition into the Seascape 18. Again designed by Sam Manuard, but obviously with considerable input from the two young entrepreneurs, the Seascape 18 is a sportsboat with a difference: light with only a 125Kg centreboard for ballast, full forward and wide aft à la Mini for better offshore handling, and with sleeping accommodation for extended cruising, she has proved hugely popular and today (2018) as we launch her for the first time on SOL, IRL over 400 have been built.
