SOL RACE RECORD

Designed by Holman and Pye in the early 1980s as a seaworthy "go-anywhere" long-distance cruiser, the Rustler 36 features a long keel with cutaway forefoot, keel-hung rudder and relatively narrow beam, which, even back then, counted as a classic form. Originally built by Orion Marine, today she is still one of the most popular builds of Rustler Yachts, a Falmouth-based traditional yacht builder, established in 2000.

Strong, heavy and rugged, she is an exceptional smaller blue water cruising yacht, and was launched on SOL specifically for the singlehanded, non-stop Golden Globe Race 2018, where IRL she was a popular choice also, attested by the action photo of Susie Goodall's DHL adjacent.
