

"I'm very happy it's my first podium after about two years of racing!

Tactic was simple and based on two important things:

- 1) hold on forever (Sir Win docet) and for me that I never do nights on sol is was hard and,
- 2) in all the waypoints (marks) I almost always the maneuver to limit the countdown and only in the last two not to miss the podium I risked less and that was very good indeed

Lunch came 1st!

A difficult thing to understand is why the server only performs the countdown a few times every 15 other times every 30 seconds!! this is likely not to make the "rounded".

Anyway congratulations to all the top ten and in particular to Lunch, Rumskib and Sassy who fought to the end! good wind to all!

ciaooooo

la Franci

Ed.NOTE: this Forum thread discusses "jumps":
