

I am very happy! it's my first win in SOI.

The race was very exciting right now with Rumskib who did not give up an inch ever.

Immediately after Waiheke S, which is Rumskib Neuroman (another great Solers) have proven to be more wide And, while Tyger tried to overtake in W. Then keeping to the always calm and risking at every turn with the countdown, I was able to contain them.

Thrill was the last stretch where we had to go at the finish line with a twa about 35 and I anticipated the wrong tack, perhaps due to too much emotion ... the hour was very late for me in Italy, but I managed to sacrifice in order to win this leg.

I thank the organizers and all the participants and I make great compliments to the podium and the whole top ten, REALLY GOOD ALL and remember if you want to be with the best ones: KEEP HARD!"
