

A special thanks to the organizers who have created a series of beautiful races. Unfortunately for us "Europeans" is a handicap race at night but the important thing is HOLD FAST.

The 3 leg have been very exciting, too bad that the last I made a big mistake at the start that I sent down the performance to 84%, and I had to say goodbye to a possible final victory! The victory of the leg has resulted in the start and in the first few turns to go north towards the mark 2 Especially in the final of the 3rd leg we have seen a reversal of the continuous partial ranking in the top positions.

I am very pleased, however, to be on the podium in the overall standings with two perfect Solers: Rumskib and Javakeda who never give up, as well as being very good, and so for me it is a real honor! Best wishes for a good wind at all and I want to wish you a wonderful day to AL_53SSITA for his son's wedding which is taking place at this very moment!
