SOL RACE RECORD

The 2016 Brisbane to Keppel Race is the first time the J130 is used in SOL!

The J130 is a proper flyer and has speed variation up into storm force winds which alas don't show in the diagram above.

It was designed by Rod Johnstone and J Boats made 43 of them from 1994 to 2002.

In the real-life 2016 race, the navigator on-board "Ragtime" (in the photo) is SOLer Kipper1258 using the same Polar as the SOL fleet on the yacht's Expedition system.
