SOL RACE RECORD

The Twister Association tells us that the first Twister was designed in 1963 by Kim Holman in Essex, England, to be a truly competitive all-wood racing yacht. About 30 wooden Twisters were built and as the design was becoming increasingly popular, a GRP racer/cruiser was developed.

The majority of Twisters were built in the 1960s and 1970s and in 1970 also as a fiberglass version, but the design wasn't retired until the 1990s.

The Twister design is a true modern classic.

The boat was incorporated in the SOL fleet in 2010.
