

Valu Hong Kong to Vietnam Race 2017, racing with 215 boats. Boat SimeMali has finished the race.

This was a nice example how less can be more. With relative flat VMG around max, with slightly less BS double gybe could be avoided. *Alexandria* has utilized this the best, gybed not too early like *SimeMali* did, but kept higher TWA that *rafa*, who suffered 2x Perf Loss.

Presuming no router can calculate this exactly, you have to 'play this by ear' and with a pinch of luck. And we all know, Brazilians have a great sense of music...;-))

Congratulations *Alexandria* and *rafa*, and thanks that seagull that landed on my bowsprit right before FL (advantage on *rafa* was by a beak).

Thanks all SOLers for racing and SOL Team for their work.

FW!

SimeMali, October 2017.
