SOL RACE RECORD

The 2016 Brisbane to Keppel Race was the first time the J130 was used in SOL!

The J130 is a proper flyer and has speed variation up into storm force winds which alas don't show in the diagram above.

It was designed by Rod Johnstone, and J-Boats made 43 of them from 1994 to 2002.

In the real-life 2016 race, the navigator on board "Ragtime" (in the photo) was SOL'er Kipper1258 using the same Polar as the SOL fleet on the yacht's Expedition system.
