

Hi, my friends!!!

The last Tall Ships Race in Sailonline's series is complete.

As you probably know, the race was won by "Fryderyk Chopin", Brig from Poland (<https://sailtraininginternational.org/vessel/fryderyk-chopin/>).

Bergen 2019-07-22

I am very proud of this, the more so because our virtual races also won the ship from Poland "WRmirekd".

It was quite difficult because I played the third stage while travelling from my home to Reykjavik. I just wanted to not lose too much to the top. It came to my surprise to take second place. In Bergen, I was handing over a yacht to a new crew and I had the opportunity to see all the yachts taking part in the "Tall ships race" from Bergen to Aarhus.

The start was postponed from July 24 to 25, which gave me an extra day to prepare after returning home. On July 23 in the morning, I was still in Bergen. Although I lost my last race against the fantastic sailing Rafa, I managed to maintain the position of the leader in the general classification. 😊
