

Gibraltar TIMED Race 2020 – Report

Noticed there was good winds and some fast Solers jumped to track so decided to join as it was a rainy day out.

Was not 100 % focused so missed windshift after start for a short moment.

At first WP Kipper made sharp turn at mark while Smo sailed under mark and then gybed to line to make final turn after mark, might have gained little or not but that's how you do it IRL.

At second mark lost one server jump to Kipper. At last mark DC was also little late but it did not affect so much downwind. In short track there was not much options for tactics, just one minor windshift and sharp sailing.

Lost to Kipper 6 seconds and Calmxy 4 seconds. Dropped my land fellow StIngFi to #4 by 6 seconds, sorry for that.

At race close weekend lost #3 by one second for Bonknhoot at sprint race.

It was nice to see Sol Legend WINSTON at track too, he came to memorialise his win in this race years ago.

Smo /May 2020
