Pacific Cup 2020 by Pelagic

I learned a lot for my first ever race online.

Note to myself:

- DO NOT sign up 15 minutes before the race starts
- DO attend weather briefing by people who are in the know
- DO NOT go for speed right at the start, this is a long race
- DO use routing software and frequently update Grib files frequently (thank you QTvlm)
- DO verify that polar charts between routing and SOL are consistent
- DO trust VMG numbers, especially in a long downwind race like PacCup

Overall great fun, it reminded me 2 years ago when I was actually on a real boat to Kanehoe!

Thanks SOL for the organization
