**SOL RACE RECORD**

This 74ft "Cape2Rio2023" racer is an exciting development of the state of the art in offshore design, shaped to reflect the unique event profile of the legendary Cape to Rio Race.

From the desk of acclaimed designer Mark Mills, creator of multiple World Championship winners – and of the very successful new Cape 31 one-design class – this light chined design is shaped to perform most strongly on the long predominantly downwind racetrack, where unusually for most ocean classics running plays a significant role.

This is a rare opportunity to bring together state-of-the-art design and the strengths of the SOL simulator platform for SOL sailors to experience – a great addition to the SOL Boathouse.
