

Christmas to Christmas Island 2020

This Christmas to Christmas race is one of my favorites for the length and especially the choice of route to take: south, north and west. Last year the start was in the opposite direction and I had finished if I remember correctly in the top 10 and in 2018 in 6th place.

For the game I use the "qtvlm" router but I confirm my route with "simsail" and AGL 13 from kipper.

For this race, it's the first time I've woken up at night for the 5-hour weather forecast, which is essential to hope to win.

I'm glad I won this race beating Aner 59 but at the cost of many hours at the helm and sleepless nights ...
