

First podium at SOL. I was very happy but not expecting it, so I didn't take any screenshots or notes. In my memories I have saved the following:

- The start was OK and I was in the middle of the field.
- Due to work commitments I didn't have much time, so I usually only did one WX update per day. In hindsight, it helped me because I didn't participate in every change in the WX.
- In the last days before the end of the race, I was more active again and was able to improve my position a bit, so that it was enough for the podium. And thus also disturbed the all-Italian podium. Sorry :D

Thanks a lot for the organisation of the race! And congratulations to everyone else too!

Fun Fact: I did all my planning for this race on my iPhone. But it worked out well. Maybe I should do it more often in the future ;)
