**SOL RACE RECORD**

Designed in 1990 by Ron Holland and Rolf Gyhlenius, the 11m One-Design is an early value-for-money strict one-design keelboat. The design has stood the test of time and today fleets continue to be raced at various centres in Scandinavia and elsewhere in Europe and Australia.

Introduced to SOL in 2013 as an appropriate choice for our simulation of the annual Vättern Kors & Tvärs on southern Sweden's Lake Vättern, we have continued to race and enjoy her good turn of speed on-line ever since.
