

The North Sea Challenge 2021

The wind was southerly and moderate, so a pleasant broad reach out to the Platform.

With wind slowly rotating anti-clock and more pressure to the north it paid to keep north both on the way out and on the way home.

All the fast guys got that right, but batatabh kept furthest north on the way out and led at the platform but rounded poorly.

On the way home, the northing had to be more radical, and those that chose to aim straight for the finish found themselves being headed off and having to tack to make the line.
