

Lanzarote to Grenada 2023 – Report by nordee

I left towards the SW to take advantage of the trade winds to project me towards the West Indies. As usual, the qtvlm router was essential in determining the precise course, except towards the end, when we had to find the right compromise with the polar for the boat direction towards the finish (SOTP : ed).

A small gripe: the headings of boats are shown on the Android app, and I find too many boats take advantage of this simply copying the heading. It reminds me of my fishing life, boats following me to fish (see Eric Cantona for a different take on this theme `when the seagulls follow the trawler, it is because they think sardines will be thrown into the sea': ed).
