

## Short report Christmas to Christmas Island

It is known that it is impossible to win passing through the Torres Strait!  
But with help of the storm Jasper near Australia, it was not difficult to be the first to reach the Torres Strait.

The problems for me arise after Torres' Strait...

### **Headwind.**

The first rule is: if you want to win, you must not lose, and you need to find a solution.

I remembered the island of Mary and the black magic there.

The inhabitants of Mary Island call black magic "**puripuri**".

They believe that the forces of good and evil act on the island.

To protect themselves, they decorate their homes and cars with bottles filled with water.

### **Therefore, the solution is to fill the bottles with water.**

As I was on a virtual ship, I doubt that virtual water bottles would help,

That's why I surrounded myself with many real cups of tea (without rum), which is basically water again.

And as you saw, being surrounded by water (tea) was no longer a problem for me.

😊😊😊😊😊😊😊😊
