

## RAJA MUDA SELANGOR INTERNATIONAL RACE 1 - 2024

CapeAgulhas does not use the QtvIm facility and relied purely on the 'Tools' tab for monitoring. I used the Rule of thumb of Halving the difference between VMC and VMG for most of the race. I think I was fortunate in deciding to gybe away from the coastline before the weather update at midday so options were not restricted from being to close shore. There was a large shift in the predicted winds which helped my position, but I should have sailed further North-East around the corner of the coastline to cut the time between myself and WRmirekd.

An enjoyable race!
