SOL RACE RECORD

SOL launched its original IMOCA 60 in 2005, but IRL a decade on, a new generation of foiling IMOCAs were beginning to outperform their already radical canting-keeled elder sisters.

Thus, when, of the record 33 entrants for the 2020-21 Vendée Globe, 19 had replaced their razor-straight daggerboards with out-curving foils, SOL decided it was high time such a craft be added to her boathouse.

Four years on, the latest foiling design iterations were regularly beating the 600nm in a day barrier, and so it was time to upgrade our online version of the polar. The beauty of SOL's version remains that you can be sure the only way you can crash her out is through a BBQ. Your foils won't break or your bow fall off or your mast come down. Be safe! Have fun!
