

Seven Seas and Seven Islands + 1

Proposed by Scott Guerin

June 3, 2025

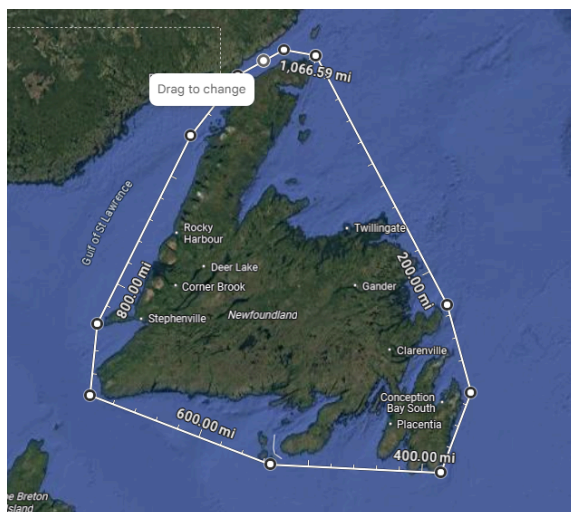

A series to sail around islands in each of the Seven Seas plus the Mediterranean.
Normalize the distances to around 1000nm by expanding the circumnavigation course.

Probably about a week per island. Guarantees every point of sail and a mix of open water and inshore / channel navigation.

- Iceland in the Arctic Ocean (800nm)

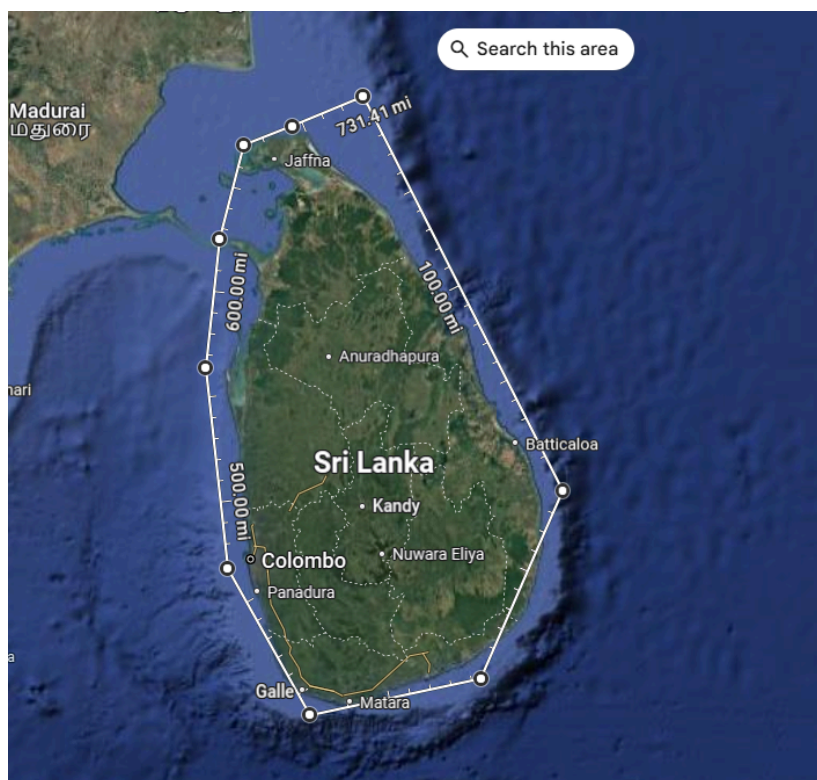

- Newfoundland in the North Atlantic Ocean (1100nm)

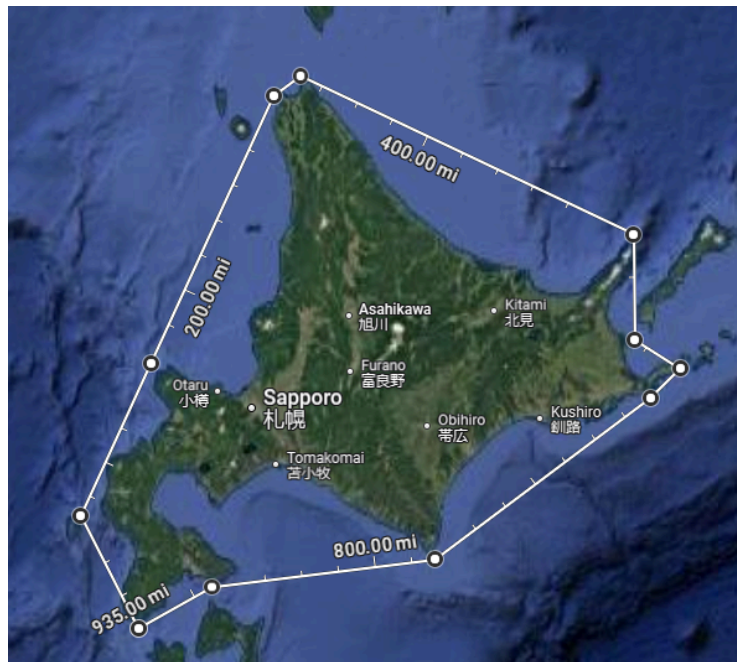

- The Falkland Islands in the South Atlantic Ocean (580nm)

- Sri Lanka in the Indian Ocean (700nm)

- Hokkaido in the North Pacific Ocean (950nm)

- Tasmania in the South Pacific Ocean (750nm)

- Kerguelen Island in the Southern (or Antarctic) Ocean (~300nm) Twice around?

-
- Plus 1: Sicily in the Mediterranean Sea (500nm)
