

Elba Rendez-vous 2025 - Race Report by KaSToR

KaSToR is always very busy because he is always on summer holiday. But as you can see, he managed to find a boat to take part in this sprint.

It took 5 hours, 22 minutes and 48 seconds to cover the 38 nm, which was 2 seconds too long compared to sassy63 and Sadlersailing, who arrived within the same second. Congratulations to them, and I invite you to read their report to learn the keys to their success.

For my part, I will have to find out how to better negotiate the buoys....

Have a great end to your holidays, those of you who are on holiday =)

KaSToR – August 2025
