

Cross the Convergence 2026 - Cocos to Sagar Island

I am on the Sailonline long time and I don't achieve some good results because I don't use any computer route predict. I just use my own prediction. And I am happy if I am within first 50. This regatta actually I was late abt. half hour on the start, but during regatta I made some good decisions and was 2nd on the end. Once some years ago I was first on the Christmas-to-Christmas regatta. Otherwise, I am old sailor and regatta man from Optimist to Snipe, Flying Dutchman when I was young and last 30 years on the small regatta boats 7 to 8 metres, last one was Melges 24. Now I am retired and not making regattas, doing swimming and fishing.
